Subject: Engineering Assistant, internship placement.

Dear Sir or Madam,

Currently first year Master's student in the Building and Energy Department at the ESIROI engineering school (Reunion Island and Indian Ocean Engineering school), my studies offer me the opportunity to carry out a 4-month internship abroad from April to August 2022. The purpose of this internship is to develop and set up a technical solution chosen by a company about building or energy.

Thanks to my last three years of engineering class, I have learned about green building, structure, tropical conception and solar resource. Moreover, thanks to my last internship in design office in a solar energy company, I have developed skills such as, autonomy, organizational skills and teamworking due to many projects carried out especially on solar roof for OLA ENERGY company.

To me, the field of energy is a very interesting field and mix energetic competence to building conception is very great opportunity to implement the knowledge that I have developed during my studies and learn about new methods and techniques from elsewhere thanks to you. Therefore, I am sure that your firm, specialized in building conception, will comfort me in my choices and that will consolidate my knowledge about this subject.

Finally, I am convinced that I will be able to provide you with all the competences I have learned during these 4 last years at ESIROI. I think that working with your team will be a very interesting experience that will allow me to apply the knowledge that I have developed during my last years of studies. Also, I would like you to know that I am very motivated to do this internship with your team and to be useful to shape your projects.

I would like to thank you in advance for your time and consideration, I am looking forward to hearing from you in the near future and remain at your disposal should you require any further information.

Yours faithfully,
Cedric Henon
